

DISTRIBUTION

STREAMLINING HEALTHCARE

Efficiency

DRAFT

Healthcare providers rely on distributors every day for the timely and reliable delivery of medical products every day.

Distributors enable:

- **A single point of contact.** Distributors reduce complexity by connecting the nation's 220,000 healthcare sites with products from more than 20,000 manufacturers in one, convenient place.
- **Time Savings.** Product orders that go through a distributor require less staff hours (30.9%) than those that go directly to a manufacturer (69.1%). Distributors reduce the number of staff and hours healthcare providers need to spend on procurement.
- **Paperless Ordering.** More than 75% of orders with a distributor are handled electronically – saving a typical hospital 77.2% off the cost of ordering products manually by phone or fax.
